

# CPCS A17 - Telescopic Handler

The Telescopic Handler course will give delegates training and assessment in operating and maintaining Telescopic Handlers through a combination of classroom based tutorials and practical instruction.

The CPCS Telescopic Handler training course is for potential and existing operators who have received no formal instruction and those requiring refresher training.

## Content covered during this course include:

- Operate the machine for all normal tasks
- Decide whether a particular load is safe to lift
- Carry out routine servicing procedures and maintenance as necessary, in accordance with the manufacturer's instructions
- Know how the machine works and the maintenance requirements involved
- Understand the effect of load, size, weight, gradients and ground conditions upon machine stability
- Know how to load, store and transport representative materials
- Understand the basic construction of pallets

## Course duration:

- Dependent upon experience

## Entry requirements:

- Delegates must have passed a CITB Health, Safety and Environment (HS&E) test no more than two years before attending this course.
- Delegates must have a good understanding of spoken and written English. Please contact us if you have any concerns in this area.

## Assessment and exams:

- The course is delivered through a combination of classroom-based tutorials and practical's. Delegates will be assessed through both theory and practical tests.

## **Qualifications/certification:**

- On successful completion of this course, delegates will be awarded a CPCS Red Trained Operator Card (on successful completion of the CPCS Technical Tests).
