

# NEW Site Environmental Awareness Training Scheme Plus (SEATS+) course

---

SEATS+ will enable your delegates to identify, signpost and manage the next level of action to be taken when an environmental issues is reported on site.

The SEATS+ key aim is to provide construction management with the knowledge, reference and information needed to manage and develop environmental scenarios that may be encountered during the working day.

This course will use a blended approach of 8 e-learning modules and a controlled condition assessment in order to deliver the test and the key learning points.
